DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-37, 46-72, drawn to performing a data access operation and providing model that describes fee schedule/total cost involved in the data access operations, classified in class 705, subclass 400.
 - II. Claims 38-42 and 44-45, drawn to calculating cost for constructing abstract queries and converting the abstract queries into physical queries related to selective data access operations, classified in class 705, subclass 400.
 - III. Claim 43, drawn to calculating cost for modification of accessed data, classified in class 705, subclass 400.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case:
 - subcombination II has separate utility such as calculating cost for constructing abstract queries and converting the abstract queries into physical queries related to selective data access operations.
 - Subcombination III has separate utility such as calculating cost for modification of accessed data.
4. The subcombinations do not overlap in scope, while they are is separately usable. See MPEP § 806.05(d).
5. The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any

Art Unit: 3628

claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
